I am a front-end-focused Full Stack Developer and also an Industrial Engineer. My main technical skills are JavaScript, React, Node, and SQL. My experience has been centered around creating scalable and efficient solutions, as well as tackling complex problems with an analytical and creative mindset. Additionally, I have experience leading teams. I am seeking a team where synergy and continuous learning are valued as key priorities. I am excited to have the opportunity to join your team and contribute to the success of your company.

Technical Skills

TypeScript, Javascript, NextJS, React, React Query, HTML5, CSS3 (SASS, LESS, MUI, Styled-component, tailwind), Storybook, React-Redux, Zustand, NodeJs, Prisma, Express, Postgres, Sequelize, Jest, Figma, Scrum.

Professional Experience

Frontend developer – Plug-Zone – November 23 to present
Roles: Frontend development.
Project: Maintenance and implementation of features for a frontend project with backend in SAP. The project is a Single Page Application (SPA) that allows organizing transportation logistics, billing inquiries, and customer service.
